Chris Fraser  
EPA Queanbeyan NSW

Hi Chris,

It appears that a Masked Owl has been sighted and photographed early in the morning of 29<sup>th</sup> September 2018 within the compartment at Corunna State Forest.  
(visit <https://atlasoflife.naturemapr.org/Community/Sighting/3768630> )

Whatever the relevant prescriptions should now be immediately applied before further logging occurs in that area.

Forestry have been informed but your oversight would be welcome to ensure the right thing is done.

Cheers  
Nick Hopkins.
