

## Estimated employment associated with the Eden chipmill

NSW	214
Victoria	138.4
Total NSW + Victoria	352.4

### Notes:

1. These figures include harvesting and haulage contractors who also supply logs to sawmills, and so are an over-estimate of the numbers actually supporting the woodchipping operations at Eden.
2. SEFE in EA on wood-fired power plant proposal said direct employment was 300, but did not specify where.
3. NSW figures are from phone check Dec 2010 (note excludes employment at the sawmills, FNSW)

SEFE	75
Eden logging workers	40
Sthn logging workers	44
Log truck drivers	55
Total NSW	214

4. Victorian figures are based on TCA stats. TCA says direct employees 618.7, includes DSE, VF, direct contractors to VF, processors and industry associations.

Direct contractors (harvesting and haulage) to VF = 197.8, of which 37.6 are based in NSW (therefore most likely doubling up with NSW figures), 21.8 are admin (VF and industry association), which leaves net figure of 138.4.

5. Employees of FNSW and VicForests are excluded from the figures as they can be redeployed in their agencies.
